## **DETAILED ACTION**

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: In response to the Final Office action of December 28, 2005, and further to the amendments and remarks filed February 27, 2006, the application has been carefully reviewed and respectfully considered.

Applicant's arguments/remarks as indicated on page 5 through 11, are believed to be distinct from the prior arts used to reject the application. The reference used against the claimed invention (Rkackman USP 6,323,961) in view (Pryor et al USP 4,739,414), still do not read on the claimed limitation of claim 1, 3, 5 and 8, alone or in combination. The Rkackman reference appears to refer to scanning the document as reading the representative data stored in memory, a software can read or scan the data out of memory in the order it was received or in reverse order.

In contrast applicant's independent claims 1, 3, 5 and 8 recite, beside other things: indexing a plurality of cross liner sampling in forward sequential order; indexing a plurality of cross liner sampling in reverse sequential order.

Claims 1, 3, 5 and 8, as well as the remaining claims that depend therefrom are in condition for allowance over the art of record.

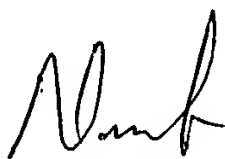

Art Unit: 2626

Therefore, claims 1-8 are allowed for the reasons the prior art searched and of record neither anticipates nor suggests the claimed invention.
